为何我们需要 CAMS

我们发现，所有真正关心以太坊的人，都对它抱有极大的期望，我们希望它改变当前的生活，让我们离未来更近。

然后，数字货币诞生了，一系列以太坊通证将成为未来的世界货币。但是他们缺乏了稳定性，这是货币属性最重要的一点，缺乏稳定性的货币将直接破坏日常的生活。这可能是以太坊生态成长数年不能普及的原因，我们看到的，它仍然停留在炒币阶段，这对以太坊名誉非常不利。

CAMS 需要稳定自身币价，维护参与进来的梦想者的数字资产。我们必须认可，所有关注币圈的人，都是我们的同行者。至少他们的投资给了我们第一笔财富，不管，他们的目的是否只是为了赚钱。我更愿意相信的，币圈吸引的都是为了未来的奉献者，维护他们的资产是 **CAMS** 的责任。

CAMS 数字货币总量固定将使它具有增值性，但是我们不会使用炒作手段，极快的增值是对币价稳定极其不利的，除非是建立在强大的落地应用。只有极快的开发落地应用，帮助人们的日常生活，才能体现 **CAMS** 的价值。

以太坊建立了起新的货币概念，它需要改变以往的金本位货币带来的货币制度，这是我们在未来启用以太坊货币，而不是其他货币的原因。显然的，以太坊通证能否担任货币角色，将极其依赖其自身的货币政策，这尚未被开发，但将是必要的一步。

CAMS 期望通过自身的货币政策，对以太坊生态内通证，对原本的

世界货币，造成冲击和影响。持有 **CAMS** 的人，将在未来变得更富有，而不必承担贬值风险。

Why do we need CAMS

We found that all the people who really care about Ethereum have great expectations for it, and we want it to change our lives today and bring us closer to the future.

Then digital money was born, a series of Ethereum tokens that would become the world's currency of the future. But they lack stability, and this is the most important aspect of the nature of money, because a currency without stability can directly undermine everyday life. This may be the reason why Ethereum's ecological growth has not been popular for several years. As we see, it is still stuck in the speculation phase, which is very bad for Ethereum's reputation.

CAMS need to stabilize their currency and maintain the digital assets of participating dreamers. We must recognize that all the people who pay attention to the coin circle are our fellow travelers. At least their investment gave us the first fortune, whether or not their purpose was just to make money. I prefer to believe that the coin circle attracts future devotees and it is CAMS' responsibility to maintain their assets.

Fixed CAMS digital currency total amount will make it value-added, but we will not use hype means, very fast appreciation is extremely detrimental to the stability of the currency, unless it is based on a strong landing application. The value of CAMS can only be realized when applications are developed very quickly to help people in their daily lives.

Ethereum creates a new concept of money that requires a change from the gold standard, which is why we're going to use Ethereum instead of other currencies in the future. Clearly, the ability of Ethereum tokens to play a monetary role will depend heavily on its own monetary policy, which has yet to be developed, but would be a necessary step.

CAMS expects to have an impact and influence on tokens within the Ethereum ecosystem and the original world currency through its own monetary policy. People who hold CAMS will be richer in the future without having to take the risk of depreciation.

优势：全新的数据模型，无限制兑换。

Advantages: New data model, unlimited convertibility.

以前的 AMM

- 1.无法实现大额兑换；
- 2.兑换偏离市价，无上限，经常偏离 10%以上；
- 3.资金池容量低时，无法兑换；
- 4.双币平衡容易打破；
- 5.兑换无连续性；
- 6.添加流动性需要双币。

Previous AMM

1. Unable to realize large conversion;
2. Exchange deviation from market price, without upper limit, often deviation of more than 10%;
3. When the capital pool capacity is low, it cannot be converted;
4. Dual currency balance is easy to break;
5. There is no continuity of exchange;
6. Dual coins are needed to add liquidity.

	资金池	市价偏离
单人兑换		
第一次	百分之五的资金池	5%
第二次	百分之五的资金池	10%
第三次	市价偏离太高	
	结束兑换	

多人兑换		
第一人	百分之五的资金池	5%
第二人	百分之十的资金池	15%
第三人	市价偏离太高	
	结束兑换	

CAMS

1. 每次兑换后，对偏离的市价进行调校，始终使兑换价值等同市价；
2. 实现连续性兑换，直到一方通证数归 0；
3. 满足大额兑换条件，且控制市价偏离在 10%以内；
4. 始终保持平衡；

5. 单币即可添加流动性。

CAMS

1. After each exchange, adjust the deviated market price and always make the exchange value equal to the market price;

2. Realize continuous exchange until the number of tokens of one party returns to 0;

3. Satisfy the large-sum exchange conditions and control the deviation of market price within 10%;

4. Balance at all times;

5. Single currency can add liquidity.

	资金池	市价偏离
单人兑换		
第一次	百分之五的资金池	5%
第二次	百分之五的资金池	5%

资金池保持平衡 无限兑换

CAMS 对市场的预估

虽然以太坊多链环境已经生成，但现有的侧链、平行链、Layer2 都未在技术方面取得实质性突破，未能撼动以太坊生态地位。CAMS 有望在未来的五年内，在以太坊没落之前，提供持续的 AMM 服务，从而获得盈利，打造千亿级市场。在未来有限的时间内，CAMSWAP 将致力开发 Layer2 技术，不走平凡与庸俗的模仿道路。团队已拟定近十项数字货币应用项目，CAMM 便是其中新的数字模型的实际应用。

CAMS market forecast

Although the multi-chain environment of Ethereum has been generated, the existing side chains, parallel chains and Layer2 have not made substantive breakthroughs in technology and failed to shake the ecological status of Ethereum. CAM is expected to make money by providing continuous AMM services over the next five years, before Ethereum dies down, creating a market worth hundreds of billions. For a limited time in the future, CamSwap will be committed to developing Layer2 technology, not the ordinary and vulgar imitation road. CAMM is one of nearly 10 digital currency application projects the team has developed.

新的数字货币概念

数字货币的定位应等同于一切的金本位货币，具有极高的稳定性，而不是变成投资盈利工具。如果我们想要数字货币应用到日常生活，则更依赖它的稳定性。在日常生活中使用它的人，并不是投资者。如果通证欠缺稳定性，将大范围的影响人们的日常生活。**CAMS** 将保证，在任何主动或被动的通缩状态下，都保证 **CAMS** 通证的单日跌幅不超过 **5%**，除非遭遇特重大变故，**CAMS** 在任何状态下，不会让通证跌破发行价的 **10%**。这将极奇依赖 **CAMS** 团队的货币政策，极具挑

战。相信这一举动，将推动数字货币向日常生活的应用，缩短未来城市的建设周期。

New digital currency concepts

The digital currency should be positioned as the gold standard of all currencies, with high stability, rather than as a profit-making investment tool. If we want digital currency to be used in everyday life, we will rely more on its stability. The people who use it in their daily lives are not investors. If the token is not stable, it will affect People's Daily life on a large scale. CAMS will guarantee that in any situation of active or passive deflation, CAMS tokens will not fall more than 25% in a single day, and CAMS will not allow tokens to fall below 10% of the issue price in any condition unless there is a major change. This will be extremely dependent on the monetary policy of the CAMS team, which will be extremely challenging. It is believed that this move will promote the application of digital currency to daily life and shorten the construction cycle of future cities.

CAMS 发展方向

在以太坊 Layer1 建立最庞大的自动做市资金池，推动以太坊数字货币流通。

全新的数据模型将兑换操作变得简单，几乎不偏离市值，维护用户资金，避免误操作产生资金损失。这种情况，在以往的 AMM 产生市价偏离时经常发生，偏离值甚至达到 300%，使用户资金损失 70%。

CAMS 在将来会建立以太坊 Layer2，发展社群经济。CAMSWAP 将实现零 gas 费兑换，不偏离市值兑换，和持续无限制兑换。繁荣的 Layer2 将以数万级别的吞吐量，成为新的区块链项目孵化所。主网内支持一键发币，和其他极高的拓展性。

Development direction of CAMS

Establish the largest automatic market making capital pool on Ethereum Layer1 to promote the circulation of Ethereum digital currency.

The new data model makes the conversion operation simple, with almost no deviation from market value, maintaining the user's funds and avoiding the loss of funds caused by misoperation. This has often happened in previous AMMs when market price deviations were as high as 300% and users lost 70% of their money.

CAMS will build Ethereum Layer2 in the future to develop community economy. CamSwap will offer zero gas conversions, no

deviation from market value conversions, and continuous unlimited conversions. The thriving Layer2 will become a new blockchain project incubator with tens of thousands of throughput levels. The main network supports a key coin issuance, and other extremely high scalability.

CAMS 理念：推动人类进步

CAMS 团队以推动数字货币发展为己任，已经做好未来十年向基础设施发展的扩展计划。**CAMS** 将推动数字货币，更快的，更安全的，应用到日常生活。团队有兴趣，并努力以区块链数字货币为基础，进行科学技术研发，为未来城市提供科技动力，和基础设施条件。

数字货币并不代表财富，而代表科技和进步，是时代的机遇。在一个时代中，每一个新的发现都带来轰动，震撼。这种喜悦并不来源于富有，而来源于希望，即使它是一个费钱的发现。数字货币的应用和牛顿定律，制造汽车，登陆月球，原子运动一样，是一个科技项目，而不是增加财富的工具。它将应用到数学，计算机和智能科技等科学领域，并且极快的为人类日常生活带来影响。

CAMS 不仅是交易的去中心化，他更是社交的去中心化，存储的去中心化，以及会带来更多的去中心化。它将改变人与人之间的联系，变得更直接，使每个人成为中心节点，这会带来思维上的改变，达到思

想变革。

CAMS 会促使人类生活变得更加合理，美好。CAMS 会把数字货币应用到儿童教育，生活娱乐，游戏休闲。以及建立慈善基金，为老人和病患带去希望。直到有一天，数字货币不仅仅代表科技，更代表关爱和生活。

CAMS Concept: Promoting Human Progress

The CAMS team is committed to promoting the development of digital currency and has made plans to expand into infrastructure over the next decade. CAMS will push digital currency, faster and more secure, into everyday life. The team is interested in and working hard to carry out scientific and technological research and development based on blockchain digital currency to provide scientific and technological power and infrastructure conditions for future cities.

Digital currency does not represent wealth, but technology and progress. It is an opportunity of The Times. In an age, every new discovery brings a sensation and a shock. The joy comes not from being rich, but from hoping, even if it is a costly discovery. The application of digital currency, like Newton's laws, building cars, landing on the moon, and moving atoms, is a technology project rather than a tool to increase wealth. It will be applied to the fields of

science such as mathematics, computers and intelligent technology, and will have an impact on People's Daily life very quickly.

CAM is not only the decentralization of transactions, it is the decentralization of social, the decentralization of storage, and it will lead to more decentralization. It will change the connection between people, become more direct, make each person a central node, which will bring about a change in thinking, to achieve a change in thinking.

CAM will make human life more reasonable and beautiful. CAM will apply digital currency to children's education, life entertainment and game leisure. And a charitable foundation to bring hope to the elderly and the sick. Until one day, digital currency will not only represent technology, but also care and life.
